Presser foot change	Snap-on/off
Thread tension adjustment	Manual
Thread tension release device	Raise presser foot to release tensions
Carrying handle	Short handle folds away in top cover
Machine cover	Soft vinyl dust cover
Foot control	Triac (No heat)
Instructional DVD	Included

Built-in top cover stitch guide

Setting machine for top cover stitch is so quick. The top cover stitch guide and spreader are built-in. Using one finger, simply push down the built-in top cover stitch guide and spreader into position. When finished, simply press the lever to retract and store away. A Janome innovation and time saving feature.

Fine mode switching lever

It's so easy to sew fine weight fabrics. Switch the lever to FINE, machine adjusts ready to stitch light weight fine knits or light weight woven fabrics. Use the STD setting for stitching standard to heavier knit fabrics/woven fabrics. A Janome innovation and time saving feature.

Built-in needle threader

3 needles to thread, use the built-in needle threader, it's easy to use and a time saver. Select the needle for threading by simply sliding the needle threader switch lever to R/M/L (right needle, middle needle, left needle), then push down on the needle threader lever and thread needle. You'll be ready to sew in no time.

Thread chain-off

Top cover stitch and triple cover stitch can chain-off to finish, similar thread chain-off as an overlocker. Depending on the sewing project, finishing options are pulling the needle threads, trim them then pull out behind the needle plate or chain-off leaving a chained thread tail.

Retractable sewing light

LED Lighting in 3 locations, includes the retractable sewing light, which pulls out to illuminate the needle area. The retractable sewing light is an inherited feature from our high-end professional sewing machines. The additional retractable lighting allows you to easily sew at anytime.
