

HORIZON®

Memory Craft 15000

INDUSTRY LEADING TECHNOLOGY
so ADVANCED so EASY...
so JANOME

**WIRELESS
CONNECTIVITY**

JANOME®

Embroider like never before

Larger and intense embroidery in one layout. Merging and transferring designs with a stitch count of 20,000. Stitch at speeds up to 1000 stitches per minute. Connect with your tablet or computer wirelessly. Pair all this with Janome's famous quality and explore all the what ifs boldly and beautifully.

Make your designs bigger and brighter on the touch display

The MC15000 boasts the biggest display in the industry! Displaying at an 800 x 480 resolution and 16,000,000 colours, the 9" HD touchscreen works the same as your favorite tablet.

Let the new needle threader make threading easy

Regardless of the technology, you still want basic tasks to be easy. The MC15000 comes with a needle threader so improved that it really only takes one hand. This new design will have you in awe at every thread change.

Five standard hoops

7) Five standard hoops from jump GR to the tiny Free arm to three square hoops, you'll have enough variety for quilting and more as soon as you open the box.

HORIZON LINK SUITE

Design embroidery & stitches on your pc

The powerful Horizon Link Suite software packages opens up even remote operation, design, and stitch combination options as well as an updated Stitch Composer tool.

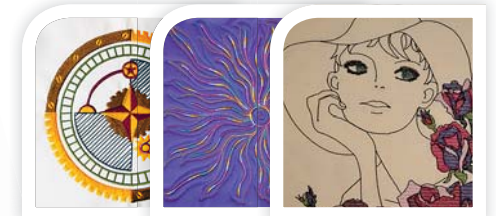

2-3 letter monograms with 11 different fonts

Choose from 11 different lettering alphabets with 46 available fonts.

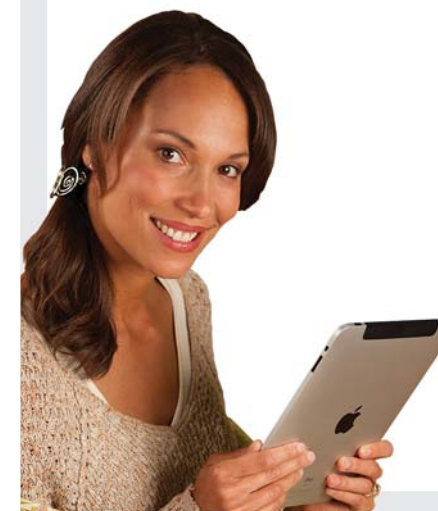

480 built-in designs, including famous designer exclusives

The designs are pre-programmed and organized in 15 categories optimized specially for the five different hoops. They can also be used in larger designs. Well-known designers have contributed some designs.

Connect wirelessly to your iPad®, laptop & PC via your home's wireless network

Your machine is designed to work with your favourite tech devices without having to hook up a bunch of cables. The MC15000 has built-in wireless connectivity to your laptop, your PC, and now, via the free AcuMonitor™ and AcuEdit™ apps, to your iPad®!

Create design layouts with the AcuEdit™ App

Use the AcuEdit application on your iPad for a complete editing suite right on your tablet. Move, rotate, enlarge/reduce, flip, corner, mirror, copy, paste, and monogram your designs. Import designs from the machine to your tablet and send the finished layout to your machine when you want to stitch it out.

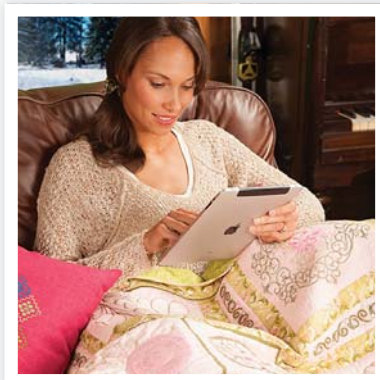

Check embroidery progress with the AcuMonitor™ App

Let your machine do the embroidery and watch the progress from you iPad, even in a different room! The AcuMonitor application watches your machine via the wireless network in your home and you can view the progress, check the machine's status, and see a list of colours being used.

I Want To... Take my quilting to a new level

Get work that is uniquely yours from the design down to the colours. Switch styles daily, but know that you'll get smooth and even stitching every time, regardless of your creative direction.

Big quilt? No problem

If you need more quilting room, push the boundaries with the MC15000's 17.25" bed and 11" on the right of the needle. Traditional and free motion quilting no longer mean worrying about how you'll fit the quilt in the machine. No matter how big, you'll always have room.

Designed for smooth free motion quilting

Make free motion quilting easier than ever with four options of accessory feet and a friction-free table, not to mention the bobbin cover.

See your work with new clarity

See your work clearer with extensive LED lights to make your workplace shadow-free. Pull out the High Light for even brighter space. It works in tandem with the AcuView magnifying system, which comes with 3 lenses, all with different strengths.

Embroidery designs created just for quilting

Dozens of designs are all new just for quilting and have been specially formatted to fit on a square. Stand-alone designs are grouped up with mix-and-match and motifs. No matter what you're quilting, the option is there.

Quilt multiple layers in perfect sync

Quilt multiple layers in perfect time with the help of the AcuFeed Flex system. Using two widths of feet, you can blast through thick layers with accuracy. Detach it when you don't need it to get rid of bulk.

Change your needle plate in one quick step

Change your needle plate without changing screws. Pull a level to release the plate and just snap the new one in! The MC15000 includes standard and straight stitch plates.

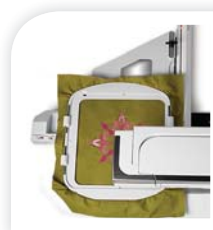

Stipple without a long arm using AcuFil™ quilting

Forget the long arm for stippling. The AcuFil system calculates and lays out stippling automatically to cover your whole quilt perfectly for amazing results.

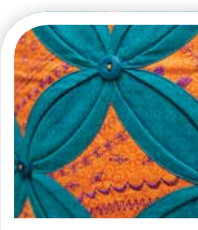

Help Bring Your Creative Vision To Life

Easy tools let your creativity flourish. With precision, speed, and all the options you need to support you work, you have the most reliability and user-friendly machine on the market. Quality, innovation, and versatility are top-notch in the MC15000.

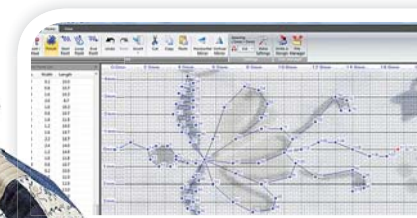

Janome sets the standard again for professional-grade embroidery, and the MC15000 carries on this great legacy

Utilizing three Linear Motion Guides and five ball bearing blocks makes performance more stable and more accurate than ever. This technology is used in high-tech industrial robots and gives you a stitch quality you can't find anywhere else, and you can still just simply sew with the units attached.

With 500 stitches, this machine boasts more stitches than any other Memory Craft machine, including 13 buttonholes. Choose from quilting, heirloom, applique, and more. Most stitches get a bolder effect with a 9mm width.

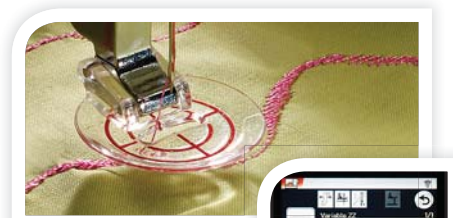

Merge stitches into original designs or compose your own with the new

Stitch Composer tool. Easier than ever, you can use your original designs just like a pre-programmed stitch with length and width alterations.

Every stitch is easily altered for width and length, and dozens

can be mirrored horizontally and vertically. Combining certain stitches can give you fabulous custom sequences ready to be sewn or saved.

Use the knee lifter to

broaden and taper your stitches in 9mm zigzags or back into straight stitches without having to take your hands off the machine.

HORIZON®

Memory Craft 15000

Technology that you can take anywhere

- iPad® Connection: Wireless
